Up & Over Garage Doors and Automatic Operators

NEW 19 standard colours on steel up & over, side hinged and garage side doors

Introducing the Garador side-hinged garage door

Garador's side-hinged garage doors have been engineered with an intuitively simple and easy-to-use design. They are ideal for garages where frequent access is required to store and retrieve larger items such as bicycles or garden tools. A lever handle is used to operate the door and both door leafs open outwards providing clear and unrestricted space within the garage.

Choose from an extensive selection of standard and made-to-measure door sizes. Three different materials are on offer to suit your garage's individual requirements, these are: steel, timber or grp (glass reinforced polyester). Each material comes in a variety of designs and colours to suit. We also offer a range of matching garage side doors.

Robust and reliable performance

Our side-hinged garage doors have been designed to provide years of reliable use and excellent security. A 75 mm wide galvanised steel door frame gives a strong and stable door construction. The hinges are concealed in the frame reducing their vulnerability to burglars and providing a seamless appearance across the surface of the door, as there are no hinge knuckles protruding.

3-way adjustable hinges allow the door position to be precisely adjusted for a smooth door action and a tight close against the rubber seal.

Two-point locking for security

A shoot-bolt latch is used to secure the top and bottom of the fixed leaf. This is easily opened and closed using an espagnolette locking system, with a centrally located flip-up handle positioned in the middle of the door.

Door stays and dampeners

A door stay at the top of the door, helps to keep the door open and stops it blowing shut, if there are heavy winds. Gas pistons are employed as dampeners for a gentle closing motion.

Sturdy weatherproof rubber seals all round

There are strong weather proof seals built into the door frame and along the door stop on both the fixed and leading door leaf. This helps to prevent drafts inside the garage and keep the rain and wind outside.

Aluminium threshold

A 20 mm aluminium threshold blocks the flow of air that can pass underneath the door. It is angled facing outwards to allow for the passage of cars into the garage and for any mild water run-off.

Modern appearance, classic steel design

Our steel side-hinged garage doors have a classic appearance that blends in with most homes. Choose from a range of traditional Georgian designs and more modern swage or wide profiled models.

Upgrade to a quick fit steel frame

A steel frame provides a faster, more accurate way of fitting your Garador up & over garage door, as the frame is constructed to fit the size of your door perfectly. Furthermore, because the frame is constructed from galvanised steel it will last for many years to come, unlike a timber frame which may warp or rot over time.

60 mm wide canopy door frame

75 mm wide retractable door frame

A colour to match

Garador steel frames are supplied pre-painted in the same colour as your garage door for a uniform appearance. A quality powder-coat paint is used to ensure a durable and long-lasting finish. For Wentwood and Sherwood timber-effect garage doors, the steel frame will be supplied in either Golden Brown or Burgundy Brown to match the boundary chassis.

Open your garage door at the touch of a button

Our GaraMatic electric operators enable you to open and close your garage door at the touch of a button. Whether driving home in your car or standing outside your garage, you can simply press a button and the door will open.

GaraMatic operators and Garador garage doors are a tried and tested combination, perfectly matched and prepared for easy installation. Choose from three operator units: GaraMatic 9, GaraMatic 10 and GaraMatic 20.

All Garador operators come with a comprehensive 5 year warranty

GaraMatic operator features

Our range of GaraMatic operators have been designed to provide years of reliable service and the convenience of opening your garage door at the touch of a button. Energy efficient LED lighting, a power saving mode and smartphone connectivity are perfect for modern lifestyles.

incl. two 4-button hand transmitters

Integrated bluetooth receiver as standard

GaraMatic 20
peak force 1000 N
incl. two 4-button hand transmitters

Integrated bluetooth receiver as standard

Engineered for security and convenience

1 Mechanical lock inside boom for security. As soon as the garage door is closed, the anti-lift kit automatically engages in the operator's boom stop, preventing any forced entry. This is a mechanical process which functions without the need for a power supply.

2 Emergency release from inside. The pull handle provides an emergency release, so the door can be conveniently opened from the inside in the event of a power failure.

3 Maintenance-free tooth belt. Unlike operators with a chain or spindle design, Garador's kevlar toothed belt does not require grease or lubricants and is therefore maintenance free. The belt is reinforced with aramid fibres, so it is tear resistant and quiet.

LED Lighting for energy efficiency
GaraMatic operators feature an integral LED light for energy efficiency. Furthermore, each model has a low power consumption of less than 1 watt in stand-by mode.

Third ventilation opening position
In addition to the half-open ventilation position, our GaraMatic operators also have a one-third ventilation position. This feature is only activated with the use of the climate sensor.

Easy to connect
A larger and more accessible connection compartment on the back of the operator, makes the integrated circuit board easier to access when connecting accessories or smarhome systems.

Check the position of your garage door

All GaraMatic operators have a remote status query feature*, so you no longer have to go outdoors in all kinds of weather to check that your garage door is closed. Simply press the button on your hand transmitter and the colour LED will indicate the door position.

* 5-button bi-directional hand transmitter required

Display of 5-button
